How to use this guide

Each page has two halves: **THE TRAP** (how to win with it) and **THE DEFENSE** (what to play when someone tries it on you).

● **winning / correct move** ● **the mistake**

1. Set the trap up on a real board and play it through with both colours.
2. Cover the move list and try to find the green-arrow move yourself.
3. Learn the defense too: at 400–1000 your opponents know many of these.
4. Start with your level, then move up.

Fool's Mate

The **fastest** checkmate in chess. Only **2 moves**. Seriously.

THE TRAP

You play Black

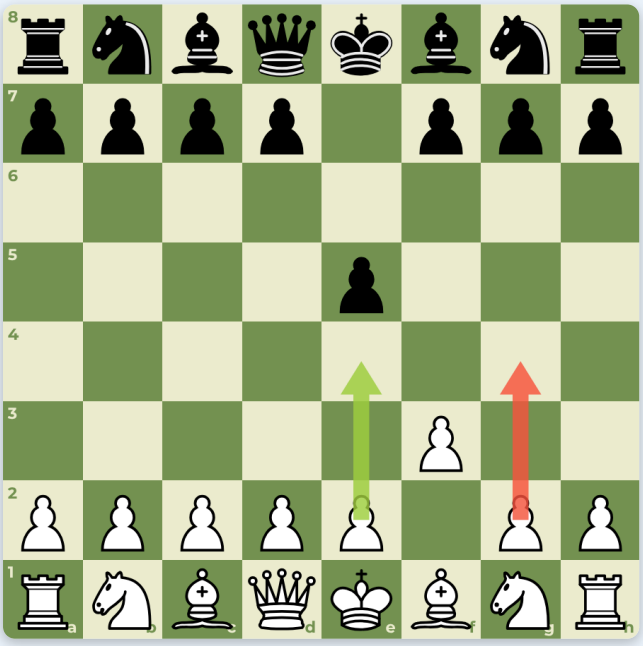

Winning move: **Qh4#**

1. **1. f3** White pushes the f-pawn. The king gets **weaker**.
2. **1... e5** We open a path for our **queen**.
3. **2. g4** Another pawn push. **Huge mistake!**
4. **2... Qh4#** Queen to h4. The king is **trapped**. **Checkmate!**

✅ **Checkmate in 2 moves**

🛡 THE DEFENSE

When they try it on you (White)

● g4 ● **e4**

Instead of ~~g4~~, play 2. e4

Play e4 instead. If the queen checks, **g3 blocks**.

Line: **2. e4 Bc5 3. Nc3**

- Keep your **f and g pawns** home early.
- Start with **e4 or d4**, then knights.
- Open line to your king? **Close it**.

Remember: Don't push your **f and g pawns** early. · They are your king's **bodyguards**. · Open line to the king = **danger**.

Scholar's Mate

Checkmate in **4 moves**. Beginners fall for this **all the time**.

THE TRAP

You play White

● Winning move: **Qxf7#**

1. **1. e4** Pawn to e4. This opens the door for our **queen** and **bishop**.
2. **1... e5** Black copies us. Totally normal.
3. **2. Bc4** Bishop out. It's **aiming at f7**.
4. Look at f7. Only the **king** protects it. That's the **weak spot**!
5. **2... Nc6** Black brings out a knight. Looks fine...
6. **3. Qh5** Queen out! Now **two pieces** attack f7.
7. **3... Nf6** Black attacks our queen... but **forgets about f7**!
8. **4. Qxf7#** Queen takes f7. The bishop protects her. **Checkmate!**

✅ **Checkmate in 4 moves**

🛡 THE DEFENSE

When they try it on you (Black)

● Nf6 ● **g6**

Instead of ~~Nf6~~, play 3... g6

Pawn to g6! It **kicks the queen** away.

Line: **3... g6 4. Qf3 Nf6 5. Ne2 Na5**

- Queen on h5? Play **...g6**.
- Queen on f3? Block with **...Nf6**.
- Early queen = **easy target**.

Remember: Queen + bishop attack **f7**. · If they forget to defend it: **game over**. · Playing Black? Stop it with **...g6** or **...Qe7**.

TRAP 3 400–600 ELO

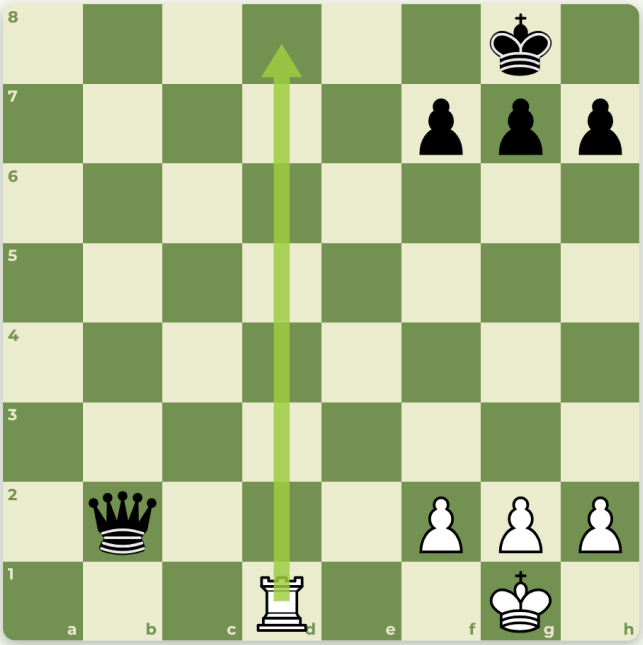

Middlegame pattern

Back Rank Mate

They have a **queen**. We have a rook. We still win in **1 move**.

THE TRAP

You play White

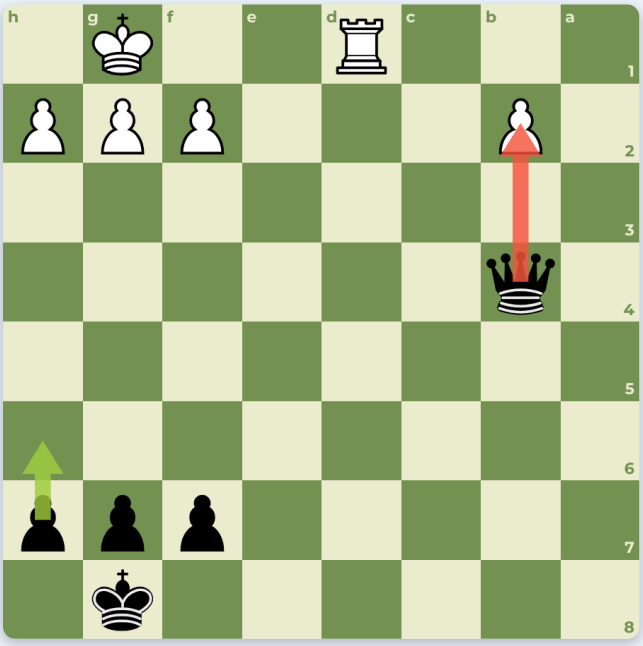

● Winning move: **Rd8#**

1. Black has a **queen**. Black is winning... right?
2. Look at their king. It's stuck **behind its own pawns**. No exit!
3. **1... Qxb2** Black gets greedy and grabs a pawn.
4. **2. Rd8#** Rook to the back row. The king **can't escape**. **Checkmate!**

✅ **Checkmate**

🛡 THE DEFENSE

When they try it on you (Black)

● Qxb2 ● **h6**

Instead of ~~Qxb2~~, play 1... h6

So first: pawn to h6. Now the king **can breathe**.

Line: **1... h6 2. Rd8+ Kh7**

- King stuck on the back row = **danger**.
- Make **one escape square** (h6 or g6).
- Then grab material **safely**.

Remember: King with **no exit** squares? Look at the back row. · One rook can **end the game**. · Protect yourself: give your king **one free square** (like h6).

Légal's Mate

Give away your **queen**... and **checkmate** 2 moves later.

THE TRAP

You play White

● Winning move: **Nxe5**

1. **1. e4 e5 2. Nf3** Normal start. Our knight **attacks e5**.
2. **2... d6** Black protects it with a pawn.
3. **3. Bc4** Bishop out. Aiming at f7, the **weak spot**.
4. **3... Bg4** Black pins our knight. 'If it moves, I **take your queen**!'
5. **4. Nc3 g6** We bring out a piece. Black plays a **slow move**. Now the trap is ready.
6. **5. Nxe5** Knight takes e5! We **leave our queen** to die!
7. **5... Bxd1** Black grabs the queen. **Big mistake.**
8. **6. Bxf7+** Bishop takes f7. **Check!**
9. **6... Ke7** The king has only **one square** to go.
10. **7. Nd5#** Knight to d5. **Checkmate!** Three small pieces beat a queen.

✅ **Checkmate**

🛡 THE DEFENSE

When they try it on you (Black)

● g6 ● **Nf6**

Instead of ~~g6~~, play 4... Nf6

Knight to f6! It guards **d5** and **g4**.

Line: **4... Nf6 5. Nxe5 Bxd1 6. Bxf7+ Ke7 7. Nd5+ Nxd5**

- Pinned their knight? Play **...Nf6** next.
- Guard **d5** and the trap dies.
- Never play **...g6** there.

Remember: A pin to the **queen** is not a real pin. · Sometimes giving the queen **wins the game**. · Free queen? First check for **checkmate**.

Scholar's Mate (Queen f3)

Black attacks the queen... and forgets f7.

THE TRAP

You play White

Winning move: **Qxf7#**

1. **1. e4 e5 2. Bc4 Nc6** Normal start. The bishop on c4 already aims at **f7**.
2. **3. Qf3** The queen joins: **two pieces** now hit f7.
3. **3... Nd4** ...Nd4 attacks the queen. Looks active, but **f7 is still weak**.
4. **4. Qxf7#** Queen takes f7, protected by the bishop: **checkmate**.

✅ **Checkmate in 4 moves**

🛡 THE DEFENSE

When they try it on you (Black)

Nd4 **Nf6**

Instead of ~~Nd4~~, play 3... Nf6

Block the queen's line to f7 with **...Nf6**. Your knight develops and f7 is safe.

- Queen on f3 and bishop on c4? Play **...Nf6**.
- An early queen is a target: develop and chase it.

Remember: Queen + bishop on f7 = mate threat. · Check f7 before every move.

Damiano's Trap

Defend e5 with ...f6? Lose your rook.

THE TRAP

You play White

Winning move: **Nxe5**

1. **1. e4 e5 2. Nf3** The knight attacks e5.

4. **3... fxe5** Black takes the knight: **the mistake**.
5. **4. Qh5+ g6** Queen check on h5; ...g6 blocks.
6. **5. Qxe5+ Qe7 6. Qxh8** Qxe5+ forks the king and the rook: White **wins the rook on h8**.

✅ **Wins the rook**

🛡 THE DEFENSE

When they try it on you (Black)

fxe5 Qe7

Instead of ~~fxe5~~, play 3... Qe7

Don't take the knight. **...Qe7** hits it and the e4 pawn, and you win the pawn back with check.

Line: **3... Qe7 4. Nf3 Qxe4+**

- Defend e5 with **...Nc6**, never ...f6.
- If the knight lands on e5, answer **...Qe7**.

Remember: ...f6 weakens the e8–h5 diagonal. · Sacrifices on e5 work when the king is open.

Petrov Queen Trap

Copy White's moves... and lose your queen.

THE TRAP

You play White

● Winning move: **Nc6+**

1. **1. e4 e5 2. Nf3 Nf6** The Petrov: Black attacks e4 instead of defending e5.
2. **3. Nxe5** White takes e5.
3. **3... Nxe4** Black copies with ...Nxe4: **already a mistake**.
4. **4. Qe2** **Qe2!** The queen lines up on the e-file with the black king.
5. **4... Nf6** The knight runs away: **huge mistake**.
6. **5. Nc6+** **Nc6+**: discovered check from the queen, and the knight hits the queen on d8.

✅ **Wins the queen**

🛡 THE DEFENSE

When they try it on you (Black)

● Nxe4 ● **d6**

Instead of ~~Nxe4~~, play 3... d6

First kick the knight with **...d6**. Only after Nf3 do you take on e4 safely.

Line: **3... d6 4. Nf3 Nxe4**

- In the Petrov: **...d6** first, then ...Nxe4.
- Never leave your king open on the e-file.

✅ **Wins the rook**

🛡 THE DEFENSE

When they try it on you (Black)

● b5 ● **Nf6**

Instead of ~~b5~~, play 3... Nf6

Don't hold on to the pawn. Develop with **...Nf6** and **...e6**: you are fine.

Line: **3... Nf6 4. Bxc4 e6**

- In the QGA, give the pawn back.
- Development beats pawn grabbing.

Remember: Greedy pawn grabs open lines. · Look for long diagonals to a corner rook.

Fried Liver Attack

4. **6. Nxf7 Kxf7** **Nxf7!** Knight sacrifice; the king must take.
5. **7. Qf3+ Kg8** Qf3+ and the king hides on g8: **the mistake** (...Ke6 was forced).

✅ **Wins the queen**

🛡 THE DEFENSE

When they try it on you (Black)

● Nxd5 ● **Na5**

Instead of ~~Nxd5~~, play 5... Na5

Don't recapture. **...Na5** kicks the bishop; you give a pawn but get fast, active pieces.

Line: **5... Na5 6. Bb5+ c6 7. dxc6 bxc6**

- After exd5, play **...Na5**.

...c6 first: it takes the d5 square away from the white queen.
